# THE PINEY WOODS HOTEL . . .

OPENS DECEMBER.

THE PINEY WOODS HOTEL, Thomasville, has become one of the most famous in the South. Its superior location, facing, as it does, the celebrated "Paradise" Park, so named because of its popularity with our Northern guests, and the taste that was displayed in its plan, and the excellent manner in which it has catered to the wants of thousands of guests, have made this fame.

From its broad piazzas the perfume of the pines finds its way to the guests.

Wide corridors divide the rooms on each floor, and each room has an outside exposure. There is a veranda frontage of 600 to 800 feet, and there is no hour of the day that the genial sunshine does not reach some portion of its wide expanse, affording the guests of the Hotel an opportunity to take one of Thomasville's celebrated sun baths.

There are no inside apartments; each room receives its due proportion of sun and air.

The rooms are arranged *en suite* and singly, and many of them are provided with private baths, etc.

The dining room, corridors and parlors are heated by steam, and all rooms are heated with either steam or open fireplaces.

The sanitary arrangements of the Hotel are perfect, each room receives its full quota of sunshine and breeze, and the proprietors pledge themselves that its attendance and general management shall be equal to the best hotels of the country.
